Introducing the Series 2 update.

More inclusions. Better controls. Improved connectivity.

ActronAir ducted systems are known for delivering reliable, energy efficient comfort that is specifically designed to suit Australia's unique climate. The Series 2 update to our Classic and ESP Plus series has raised the bar higher, with a host of new improvements and features.

All New L Series Controllers

» Best standard control inclusion on the market
» Master Wall Controller comes with NFC as standard, allowing for quick and easy access to operating instructions
» Available in your choice of white or grey
» Also available for ESP Ultima Zone Controls and Zone Sensors
» Backwards compatible with a range of existing ActronAir systems including –Classic series 1, ESP Plus/Ultima series 1, ESP Platinum Plus/Ultima, Tri-Capacity
» Ultima controls and sensor on Ultima upgrade

Sound Improvements

» A combination of different design features developed to improve sound performance that vary between the Classic and ESP Plus systems, and can include:
- Double isolation for the compressor
- Anti-vibration rubber
- Re-engineered front foot design
- Increased base panel thickness
- 3 speed outdoor fan

Home Automation Compatibility

» The Series 2 update includes the ability to operate with a new bridging platform that, when used in conjunction with a BMS card, can assist in integrating our systems with over 40 home automation systems, including:

Control4 · push · VANTAGE · SAVANT · ELAN · KNX

8 Zones Included As Standard

» All Series 2 ducted systems now come with 8 zones available from the factory, removing the need to purchase or install a separate zone kit
» Reduces installation time

But wait, there's more.

Classic Series 2 is the first product range to operate on our all new controls platform, which provides a host of new functions:

Up to 3 x 7 Day Wall Controllers

» The new control platform can support up to 3 x 7 Day Wall Controllers, allowing for more convenience, superior control, and improved comfort, with their in-built temperature sensors allowing you to add more temperature sensing points

Up to 3 x Remote Sensors

» The new controls platform can also support up to 3 remote sensors, each of which can be assigned to a zone to provide better temperature control for improved comfort

- Maximun of two sensors per zone

Zone Balancing

» New ability to adjust the damper blade (minimum/maximum) opening positions, making commissioning simpler and removing the need to purchase additional balancing blades in some cases

Improved Commissioning

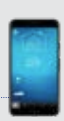
» You can now configure the system for various control methods (ActronAir Wall Controller, BMS, 3rd Party Controls), all through the outdoor PCB
» Wall Controllers auto assign their address on start-up

Wider Operating Range

» With its all-new 3 speed outdoor fan, the Classic Series 2 can now provide cooling in temperatures as low as +5°C
» This third fan speed also provides quieter operation

- Excludes CRA100S / CCA100S

Manual Inputs Capable for Third Party Control

» The new controls platform supports 3rd party connectivity as standard, with no need to purchase any additional variations or upgrades


Current Ducted Product Range
